# 2009 CE Code, Part I – What's New

This interactive, online course provides the information and details of the various components of the 2009 Canadian Electrical Code - Part I, which have recently been added, deleted, amended or clarified.

Upon completion of this course, participants should be comfortable with the information presented as it is required that they be able to understand and apply changes to the Rules in their positions.

---

## Course Objectives

This course explains the changes to the 2009 Canadian Electrical Code - Part I, by breaking them into 6 categories:

- Safety Improvements;
- Clarification of the Existing Wording;
- Correlation with Product Standards Requirements/Editorial;
- Technological Change/New Rule;
- Correlation/Harmonization with the NEC, NBCC and Other Relevant CSA, NFPA or ULC Standards

The explanation of each change includes:

- The **description** of the change;
- The **reasons** for the change;
- Who/ what will be **affected**;
- The **explanation** of the change; and
- The **implication** of the change
