CSA Standards' eLearning courses and tools provide a cost-effective and flexible learning experience for people of all skill levels and learning styles through a self-directed and interactive learning process. Courses are designed for maximum skills-transfer in minimal time.

Benefits to Organizations and Managers

For your organization, CSA eLearning offers self paced courses in a convenient, effective, and affordable way to enhance training, optimize resource time and acquire practical skills.

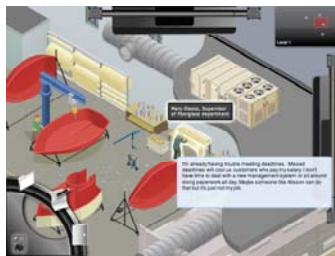

- CSA eLearning provides an easy to deploy, easy to administer and easy to use solution for any organization size or industry.
- CSA eLearning provides a consistent delivery of material developing a shared language between employees and understanding in the workplace.
- CSA eLearning helps reduce training expenditure by eliminating extensive travel and lodging costs as well as lost time costs for your employees.

Benefits to Individuals

For individuals, CSA eLearning is an engaging and efficient way to understand the technical and implementation requirements of standards or to prepare for a certification exam or audit.

- CSA eLearning promotes the rapid acquisition of both knowledge and practical skills utilizing scenarios, progress monitors, feedback points, quizzes and self assessments.
- CSA eLearning offerings address specific training needs and learning styles, allowing individuals to learn at a time, place and pace that suit them.
- CSA eLearning features relevant subject matter within familiar practice environments drawn on the experience and best practices of subject matter experts.

eLearning

CSA Standards' eLearning series range from simple awareness learning, through more immersive implementation and audit management training, to emergency preparedness and response skill-building.

Occupational Health & Safety	<ul style="list-style-type: none"> Engaging WHMIS: Training for Safety Success Machinery & Equipment Safety Safety at Work: An Introduction to Z1000 (and OHS 18001) Safety at Work: Implementing an OHS Management System Accident Investigation Resource
Public & Community Safety	<ul style="list-style-type: none"> Response Ready Simulation Tool

CSA Education and Training offerings reflect our commitment to provide training in 54 different technology areas that is relevant, timely, convenient and cost-effective regardless if you choose to take a series of eLearning courses; enroll in a seminar; or do a combination of both.

Blended Learning combines the benefits of instructor-led seminars with a variety of self-paced eLearning tools to deliver exceptional educational experiences. Learners will have easy access to different learning resources in order to apply the knowledge and skills they learn under the supervision and support of the instructor inside and outside the classroom.

Onsite training courses can be delivered "off-the-shelf", slightly modified or completely customized for the learning needs of your team, department or everyone in your organization. Included with every in-house program are comprehensive written materials for permanent reference.

Seminars and conferences are held in multiple cities across North America. Full course information, prerequisites requirements, and registration forms are available for download on www.csa.ca.
