Safety at Work

Implementing an Occupational Health and Safety Management System

AUDIENCE

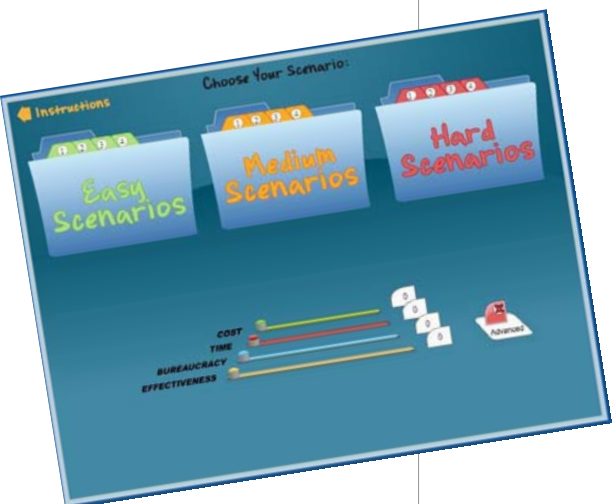

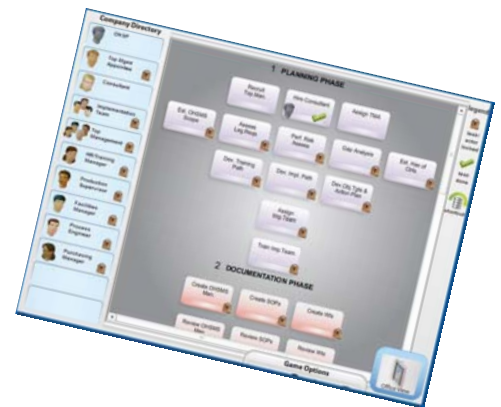

Individuals directly involved in developing, implementing, or supporting their organization's Occupational Health & Safety Management System

- Occupational Health & Safety Practitioners
- Department Heads, Supervisors, Managers
- Documentation specialists
- Members of the implementation team
- Members of the internal audit team
- Staff responsible for Occupational Health & Safety issues

About

Safety at Work: Implementing an OHSMS is an interactive learning module which allows students to practice planning and managing the effective implementation of an Occupational Health & Safety Management System (OHSMS) online, prior to engaging in a workplace implementation. This online training product is based on the Occupational Health and Safety Management System standards. It is applicable to a wide variety of standards, including Z10, Z1000 or OHSAS 18001. In this module, students will:

- Explore a fictional manufacturer, choose an outcome for the OHSMS implementation, and assign tasks to staff members being mindful of how selections align with desired outcomes.
- Manage the scope of implementation, develop a plan and, through trial and error, learn to avoid pitfalls.
- Understand roles in the implementation process and explore the resource challenges and trade-offs.

Advantages for your organization:

- Efficient online training, employees learn according to YOUR scheduling requirements;
- Choose from multiple scenarios, each reflecting different sets of resource constraints that represent your actual workplace environment;
- Ensure that implementation-critical staff have explored OHSMS implementation paths and pitfalls before they start the process within the organization;
- Increase understanding of the implementation process, as well as challenges and success factors; and
- Introduce your Internal Auditors to the OHSMS requirements.

Pre-Requisite(s)

There are no formal prerequisite requirements for this learning module. A general understanding of Occupational Health & Safety standards may be of benefit to learners, but is not required to participate in this module. OHS management system requirements will be explored as learners participate in a virtual implementation.

How to access

Safety At Work: Implementing An OHSMS is available for purchase from our website

This product is accessed via the internet. The only program required (other than an internet connection) is the latest version of Flash Player, which may be downloaded, free-of-charge, at www.adobe.com
