Interactive hazardous materials training

ENGAGING WHMIS:

Training for Safety Success

BENEFITS

- Know your duties and responsibilities under WHMIS regulations
- Know the WHMIS hazard classes and symbols and their meanings
- Understand the types of information provided on supplier and workplace labels
- Understand the information on MSDSs as well as be aware of any possible harmful effects, preventive measures and administration of first aid
- Understand the procedures to follow in the event of a spill, release, fire or poisoning and the use of protective equipment
- Know how to control hazards to reduce the amount of personal injuries, illnesses, and property damage associated with the use of hazardous products

The Workplace Hazardous Materials Information System (WHMIS) is Canada's national hazard communication standard. The key elements of the system are cautionary labelling of containers of WHMIS "controlled products", the provision of material safety data sheets (MSDSs) and worker education and training programs.

Employers are required to review the information and training provided to workers concerning hazardous materials at least annually or more frequently if new hazard information becomes available or if required by a change of conditions.

Product Overview

Engaging WHMIS: Training for Safety Success is an effective interactive eLearning module which offers a complete training and testing solution to meet the requirements of general employee WHMIS compliance. This course meets the needs of both first time and refresher training. A certificate of completion is issued upon passing.

Fast, efficient and cost-effective

CSA Standards suite of interactive eLearning modules are designed to offer faster learning at reduced costs, increased access and clear accountability for all participants in the learning process through the use of: self-directed learning; interactive eLearning; self-assessment test preparation; and many other methods.

- Improve your bottom line
- Enhance your internal training program
- Provide a controlled environment for skill development at a comfortable pace
- Remove geographic barriers
- Provide online assessment

eLearning

FEATURES INCLUDE

- Be placed in the fictional role of a new employee tasked with assisting their employer, a company that leases office space with meeting compliance to the WHMIS
- Experience exactly how WHMIS is used in the workplace through scenarios such as using a Material Safety Data Sheet to determine the correct spill procedures, where to use workplace labels and dealing with chemicals left onsite by contractors.

From Awareness to skill building

Our Interactive eLearning series range from simple awareness learning, through more immersive implementation and audit management training, to emergency preparedness and response skill-building.

AUDIENCE

- Employees who work with or near controlled products
- Students who require practical skills to get into the workforce
- Health committees, representatives or employers who have identified a requirement for retraining due to a change in work conditions or available hazard information

Related Education and Training available

- Safety at Work
- Accident Investigation
- Respiratory Protection
- Workplace Electrical Safety
- Machinery and Equipment Safety
- Response Ready
- Fall Protection
